

## Kok Yew Ng (Mark Ng)

### PERSONAL & CONTACT INFORMATION

*Nationality:* Malaysian  
*Research Website:* <http://www.markusng.com>

### RESEARCH INTERESTS

Fault diagnosis, mathematical modelling, control systems, anomaly detection and classification

### EDUCATION

Ph.D., Control Engineering and Fault Diagnosis 2009  
Monash University, Australia  
*Thesis: "Advancements In Robust Fault Reconstruction Using Sliding Mode Observers"*  
*Supervisor: Assoc. Prof. Tan Chee Pin (School of Engineering, Monash University, Malaysia)*

BEng (Hons), Electrical and Computer Systems Engineering 2006  
Monash University, Australia

### CURRENT EMPLOYMENT AND AFFILIATIONS

**Lecturer (Mechatronics Engineering and Control) 2017–Present**  
**Leader of the Control Engineering and Industrie 4.0 Laboratory**  
Ulster University, U.K.

I am the Module Coordinator Control Engineering related modules taught to undergraduate and postgraduate students:

- EEE526 Mechatronics 1, 2017–Present.
- EEE316 Control Theory and Applications, 2018–Present.
- EEE838 Advanced Automation and Control, Commencing 2021.
- EEE607 Control for Mechanical Engineers, Commencing 2021.

Research wise, I am attached to the Nanotechnology and Integrated BioEngineering Centre (NIBEC) at the Jordanstown Campus, where I lead the Mechatronics and Control Research Group, working mainly on the control and anomaly detection of mechatronic systems, Industry 4.0, as well as biomedical and healthcare related applications.

I am also a co-investigator in SAFEWATER, a £5 million project funded by GCRF, where I lead the development and the optimisation of embedded algorithms in the SAFEWATER project. These embedded algorithms will be used for controlling the low-cost water disinfection technologies that are being developed during the SAFEWATER project.

I am a Senior Member of the IEEE and I am currently a Committee Member of the IEEE Control Systems Society (CSS) UK and Ireland Chapter. I am Associate Editor for *IEEE Access* and an Editor for *PeerJ Computer Science*. I am also a Moderator for *IEEE TechRxiv*.

During the COVID-19 pandemic, I lead the Modelling and Forecast Task Force at Ulster University where we work very closely with the Southern Health and Social Care Trust to provide analysis to the Governments Specialist Modelling Response Expert Group in Northern Ireland. The main purpose of the project is to validate and inform the Modelling

Response Team's work as well as help governing bodies in Northern Ireland to better plan for intervention measures and ultimately flatten the curve. I am also a member of the COVID-19 Task Force set up by the IEEE Region 8 community. In addition, I lead a team of researchers and data scientists from Ulster and Queen's University Belfast to work with the Incident Controller for the State Health Incident Control Centre and Deputy Chief Health Officer of the Department of Health in Western Australia to model the outbreak of COVID-19 on cargo vessels.

**Adjunct Senior Research Fellow**

**2017–Present**

School of Engineering, Monash University, Malaysia

PAST EMPLOYMENTS AND AFFILIATIONS

**Senior Lecturer**

**2016–2017**

**Lecturer**

**2009–2015**

School of Engineering, Monash University, Malaysia

I was responsible as the coordinator of a few units related to Control Engineering for various disciplines offered at the campus. I developed a new unit, ECE3062 Electronic Systems and Control, which is offered at both Monash University Malaysia and Australia campuses. I was an active researcher especially in the area of Fault Diagnosis with quality publications in international peer-reviewed journal articles, including the prestigious *Automatica* and *IEEE Transactions on Automatic Control*. I also conducted trainings and was involved in a few consulting projects with the industry. I was the coordinator for the following units:

- ECE2061 Analogue Circuits, 2016–2017.
- ECE2031 Circuits & Control, 2015.
- ECE3062 Electronic Systems & Control (a unit I developed for Monash), 2011–2013.
- ENG1030 Electrical Systems, 2011–2013.
- ECE2021 Electromagnetism, 2010–2012, 2015–2016.
- MEC3457 Systems and Control, 2010–2011.
- ECE3031 Control Systems, 2010.
- ENG1020 Engineering Structures, 2009.
- ENG1060 Computing for Engineers, 2006–2009.

**Postdoctoral Fellow**

**Jan–Mar, 2016**

Linköping University and Volvo Car Corporation, Sweden

*Collaborators: Prof. Erik Frisk, Assoc. Prof. Mattias Krysander, and Dr Daniel Jung*

I continued to work on the project described under my position as a Postdoctoral Fellow with the same institution. Besides further developing the FI scheme on paper and via simulations, the project also progressed to the testing of the designed FI schemes onto the actual engine in the Engine Lab via the dSPACE control system.

**Postdoctoral Fellow**

**2014–2015**

Linköping University and Volvo Car Corporation, Sweden

*Supervisor: Prof. Erik Frisk*

I was based at the Division of Vehicular Systems (FS) headed by Prof. Lars Nielsen at Linköping University, Sweden, where I worked on Fault Diagnosis of Single-Turbocharged Gasoline Engine with Volvo Car Corporation (VOLVO) using both model-based and data-driven methods.

I also developed the GUI-based Simulation Environment on Matlab and Simulink used by Volvo for the following:

- Realistic modelling and control of the engine

- Injection and realistic simulations of a variety of actuator, sensor and variable faults in the engine
- In-house designed algorithm for additional residuals selection
- In-house designed algorithms for alarm generations, residuals monitoring as well as Fault Isolation (FI)
- Simulation and FI of system with intermittent residuals

#### **Graduate Student**

**2006–2009**

Ph.D. research and teaching support.

#### **HONOURS AND AWARDS**

Learning and Teaching Award, Ulster University Students' Union, 2020

Erasmus+ Staff Mobility Program, 2018

Monash University Malaysia PVC's Award for Excellence in Research, Round 1, 2012

Letter of Commendation for Excellence Unit Evaluation Result from the Associate-Dean (Education), Faculty of Engineering, Monash University Australia, 2012

Top 50 Best Units Offered by Faculty of Engineering (ranked #22) Across All Campuses of Monash University, 2010

Monash University Malaysia PVC's Award for Excellence in Teaching, Round 2, 2011

Monash University Malaysia PVC's Award for Excellence in Teaching, Round 1, 2011

Monash University Malaysia PVC's Award for Excellence in Teaching, Round 2, 2010

Monash University Malaysia PVC's Award for Excellence in Teaching, Round 1, 2010

Monash University Malaysia PVC's Award for Excellence in Teaching, Round 2, 2009

Higher Degree by Research Scholarship for Ph.D. in Engineering, 2007

Postgraduate Research Scholarship for Master of Engineering Science by Research, 2006

Monash University Malaysia Entrance Scholarship, 2002

## GRANTS

Monash University Malaysia-ASEAN Sustainable Development Research Grant Scheme	2020
<i>Co-investigator</i>	MYR980,000
Genomic variations and association study of agronomic traits in Malaysia, Myanmar and Thailand weedy rice ( <i>Oryza sativa</i> L.)	
Global Challenges Research Fund (GCRF), UK	2018
<i>Co-investigator</i>	GBP4,889,812
Low cost technologies for safe drinking water in developing regions (SAFEWATER)	
Erasmus+ Staff Mobility Programme	2018
<i>Principal Investigator</i>	GBP934.45
Visiting academic to the Faculty of Electrical Engineering and Autonomous Vehicle Research Team, Augsburg University of Applied Sciences (UAS), Germany with the delivery of lectures and research seminars, as well as establishing new research collaborations with UAS	
NVIDIA GPU Grant Programme	2018
<i>Principal Investigator</i>	GBP500
Recipient of a Jetson TX2 Developer Kit by NVIDIA to study the use of machine learning algorithms in control systems	
Volvo Car Corporation, Gothenburg, Sweden	2015
<i>Co-investigator</i>	SEK960,000
Design and Development of A Simulation Environment and A Fault Isolation Scheme on A Volvo VEP4 MP Engine	

Industrial Collaboration with ItraMAS Corporation Malaysia	2013
<i>Principal Investigator</i>	MYR50,000
Mobile Control of Intelligent Lighting Systems	
 Monash University Malaysia	 2012
<i>Principal Investigator</i>	MYR55,000
Application of Sliding Mode Observer for Fault Diagnosis on A Robotic System	
 Fundamental Research Grant Scheme, Ministry of Higher Education, Malaysia	 2010
<i>Co-investigator</i>	MYR30,000
Development of Common Observer Schemes Using Sliding Mode Techniques For Robust State Estimation And Fault Detection And Isolation	
 Monash University Malaysia	 2010
<i>Principal Investigator</i>	MYR35,000
Embedded Mathematical, Simulation and Control Application on Mobile Computing Platform	

\*GBP1  $\approx$  MYR5.80, SEK11.74 as of August 17, 2021

- *International Journal of Applied and Computational Mathematics (IACM)* (Springer)
- *International Journal of Advanced Robotic Systems (IJARS)* (SAGE)
- *International Journal of Robotics and Automation (IJRA)* (ACTA Press)
- *International Journal of Control (IJC)* (Taylor & Francis)
- *Australian Journal of Electrical and Electronics Engineering (AJEEE)* (Taylor & Francis)
- *International Journal of Intelligent Unmanned Systems* (Emerald)

#### Examiner of Postgraduate Students (University, Number of Students Examined)

- Deakin University, Australia (5)

#### Committees and Professional Affiliations

- Committee Member, UK and Ireland Chapter, IEEE Control Systems Society (CSS)
- Fellow, Higher Education Academy UK (2018–Present)
- Senior Member, IEEE
- Member, IEEE Systems Council
- Member, IEEE Young Professionals
- Member, IEEE Council on Electronic Design Automation
- Member, IEEE Big Data Community
- Member, IEEE Internet of Things Community
- Member, IEEE Vehicular Technology Society Technical Community on Big Data
- Member, IEEE Vehicular Technology Society Technical Community on Cloud Computing
- Member, IEEE Vehicular Technology Society Technical Community on Connected Vehicles
- Member, IEEE Vehicular Technology Society Technical Community on Pattern Analysis and Machine Intelligence
- Auditor, IEEE Robotics and Automation Society (RAS) Malaysia Chapter (2010 & 2011)
- Graduate Member, Board of Engineers Malaysia (BEM)
- Representative from School of Engineering, Campus Review Panel for Higher Degree by Research Course (Monash University Malaysia, 2011)

## SUPERVISION OF RESEARCH STUDENTS

- Ms Stefanie Wucherer (German)
  - Project Title: Developing a hybrid model and supervised learning approach for automated handling tasks using tactile feedback
  - Institution: Ulster University, UK in collaboration with Augsburg University of Applied Sciences, Germany (MoU collaboration)
  - Supervision type: First supervisor
  - Candidature: Ph.D. (Ongoing)
- Mr Will Aston (British)
  - Project Title: Industrialised manufacturing processes for 3D printable biomedical sensor devices
  - Institution: Ulster University, UK
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Ongoing)
- Mr Scot Davidson (British)
  - Project Title: Advancements in the Study of Using Machine Learning for Abnormalities Detection and Classification of Biomedical Signals
  - Institution: Ulster University, UK
  - Supervision type: First supervisor
  - Candidature: Ph.D. (Ongoing)
- Miss Niamh McCallan (British)
  - Project Title: Advancements in Detection and Classification of Anomalies in Multidimensional Biomedical Signals Using Data-Driven Techniques
  - Institution: Ulster University, UK
  - Supervision type: First supervisor
  - Candidature: Ph.D. (Ongoing)
- Mr Towfeeq Fairouz (Iranian)
  - Project Title: Assessing the role of deep-learning in image-analysis of biosensing colour changing elements
  - Institution: Ulster University, UK
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Ongoing)
- Mr Da Yi Lee (Malaysian)
  - Project Title: Genome-Wide Association Mapping and Phenotyping for Agronomic Traits in Malaysian Weedy Rice (*Oryza sativa*)
  - Institution: Monash University, Malaysia
  - Supervision type: Joint supervisor
  - Candidature: Masters by Research (Ongoing)
- Mr Leong Hwee Lee (Malaysian)
  - Project Title: Vermicomposting of Wastewater Sludge Produced from the Treatment Pond of Palm Oil Mill Effluent
  - Institution: Monash University, Malaysia
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Completed, 2018)

- Mr Samuel Jia Wei Tang (Malaysian)
  - Project Title: Intelligent Lighting Control System Using Mobile Computing Devices (a collaboration with ItraMAS Corporation)
  - Institution: Monash University, Malaysia
  - Supervision type: First supervisor
  - Candidature: Masters by Research (Completed, 2018)
- Mr Jiunn Yea Ng (Malaysian)
  - Project Title: Development of Common Observer Schemes using Sliding Mode Observers for Robust State Estimation and Fault Detection and Isolation
  - Institution: Monash University, Malaysia
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Completed, 2016)
- Mr Jeremy Hor Teong Ooi (Malaysian)
  - Project Title: Fault Reconstruction using Sliding Mode Observers for Descriptor Systems
  - Institution: Monash University, Malaysia
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Completed, 2015)
- Ms Chew Yee Kee (Malaysian)
  - Project Title: Development of Sliding Mode Functional Observer Schemes
  - Institution: Monash University, Malaysia
  - Supervision type: Joint supervisor
  - Candidature: Ph.D. (Completed, 2014)
